## EDUCATION

### Istanbul University

B.S. Computer Engineering

Sept 2019 - June 2023

Istanbul, TR

## SKILLS

- UX, Front-end development
- PostgreSQL, MongoDB, Vector DB
- Responsive Web Design
- React, Next.JS, Vue.JS
- Google Cloud
- Python, Django, FastAPI
- Flutter
- Kubernetes
- Javascript/NodeJS
- Terraform
- Linux, C/C++
- Data Observability (LGTM), Datadog
- Agentic AI, LangChain
- Agile, Scrum

## PROFESSIONAL SUMMARY

Experienced Full Stack Web Developer with over 4 years of expertise in building dynamic, user-centric websites from start to finish—including development, deployment, and ongoing observability. Skilled in leveraging a wide range of programming languages and frameworks to deliver scalable, high-performance solutions. Proven ability to manage complete project lifecycles with a strong focus on reliability and maintainability. Recently developed a growing interest in agentic AI, exploring its potential to enhance intelligent system design and automation.

## WORK EXPERIENCE

### Full-Stack Developer

#### Invisible

- May 2024 - Present Remote
- Built FastAPI endpoints integrated with celery queues, streamlining backend workflows and improving processing efficiency.
- Deployed client-facing Streamlit apps on Kubernetes via ArgoCD, enhancing delivery speed and scalability.
- Designed Datadog dashboards to boost system observability and enable proactive issue resolution.

### Full-Stack Developer

#### Ironji Ltd

- Sept 2020 - May 2024 Hybrid
- Implemented real-time notifications using WebSockets to revolutionize user engagement and communication, resulting in a significant increase in user satisfaction and interaction.
- Successfully integrated ChatGPT API, Pinecone, and Redis to enhance the QA bot, enabling seamless and natural customer interactions, ultimately improving customer satisfaction and user experience.
